### **DETAILED ACTION**

This is a response to the Applicant's amendment submitted on 5/14/2009. In virtue of this amendment, claims 1-4 are now present in the instant application.

#### ***Drawings***

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Fig. 15 of the amended drawings contains a clear error. Fig. 15 shows the tri-splitting means as being shifted so that it intersects the optical path length adjusting member 1502 and the incident light rays are no longer aligned with the reflective surfaces of the tri-splitting means. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

#### ***Response to Arguments***

2. Applicant's arguments, see Applicant's Arguments/Remarks Made in an Amendment, filed 5/14/2009, with respect to claims 1-4 have been fully considered and are persuasive. The rejections of claims 1-4 have been withdrawn.

Regarding claim 1, Applicant has amended the claim to indicate that all of the incident light which strikes the bi-splitting means is split into three portions when the tri-splitting means is used. The prior art of record does not disclose the newly added limitation, but rather uses a subset of the incident light to be split into three portions as

the incident light which is split into two portions. Since the prior art of record does not meet the new claim limitation the rejection to claim 1 has been withdrawn.

Regarding claims 2-4, claims 2-4 are dependent on claim 1; therefore the rejections of those claims have been withdrawn for substantially the same reasons as were stated regarding claim 1, above.

### ***Allowable Subject Matter***

3. Claims 1-4 are allowed.

Regarding claim 1, the prior art fails to disclose or fairly suggest an image shooting apparatus in which "the bi-splitting and tri-splitting devices [are] configured such that all of the incident light that is split into two split light portions by the bi-splitting device is split into three split light portions by the tri-splitting device" in combination with the remaining claim limitations recited in claim 1.

Regarding claims 2-4, claims 2-4 are dependent on claim 1, and are allowed for substantially the same reasons as were stated regarding claim 1, above.

4. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
